

Knight Aerospace Strategic Partnership Opportunities in India

Who We Are

Knight Aerospace is a U.S.-based AS9100-certified aerospace engineering and manufacturing company specializing in deployable mission systems, aircraft modules, palletized solutions, and Ground Support Equipment (GSE) supporting military and government operators worldwide.

For more than three decades, Knight Aerospace has supported military airlift and special mission operations across platforms, including the C-130, C-390, C-17, and A400M.

Knight Aerospace maintains collaboration with Lockheed Martin and Embraer on integration and airworthiness activities for Knight systems and products within the C-130 and C-390 aircraft, and is also supporting medical module integration within the Airbus A400M ecosystem.

Core Capability Areas

Aircraft Modules

- Aeromedical evacuation modules
- Infectious disease containment systems
- VVIP and missionized interiors
- Deployable medical capability

All modules and palletized systems are designed without requiring permanent aircraft modifications.

Ground Support Equipment & Sustainment

- Aircraft maintenance equipment
- Cargo handling systems
- Engine transport and support systems
- Expeditionary loading systems
- Specialized tooling and support infrastructure

Partnership Interest in India

Knight Aerospace recognizes India as a strategically important aerospace and defense market and is actively seeking long-term partnerships with organizations or individuals capable of supporting Defense and government engagement, market development, and customer access.

Knight Aerospace is fully open to supporting “Make in India” initiatives through local manufacturing participation, subsystem integration, assembly activities, engineering cooperation, and the development of long-term sustainment capabilities.

Palletized Mission Systems

- Passenger seating systems
- Medevac pallets
- Special operations support systems
- Crew rest and mission support configurations
